Once the printer installation is completed, a window will prompt you to print a Density Test Page.

RECOMMENDATION

Based on our internal testing, we recommend that on Section 3 of the **Density Test Page** you enter the following ink density target number based on the use of GO ScreenMate[™] Film:"

RESOLUTION	CHANELS	DENSITY
1440 X 1440 Big Dots	All	7
1440 x 1440 Small Dots	All	11
1440 x 720 Big Dots	All	13
1440 x 720 Small Dots	All	19

Ink Density Test Page	\times
These simple steps will determine the optimum ink density for the combination of your printer ink and media.	
1) Make sure your printer is ready to print.	
2) Click the "Print Test Page" button. ("low ink level" recommended first)	
Print Test Page (low ink level)	
Print Test Page (high ink level)	
3) From the test page, enter your selected ink density target number into the box below.	
5	
4) Click the "Done" button to return to FilmMaker v10 XL+. This queue is now ready for printing.	
Done	
Note: You can re-run this wizard from the "Queue" menu.	
Re-configure Ink Slots (Optional) Cancel	
	-

When you have inputted the Density Target, click **Done**.

4. You are ready to work with FilmMaker!

IMPORTANT: Please ensure that it states that the version of the printer driver used for the ET-8550 should be 1.3, which is critical for proper print output. If a window pops up asking for the color reference on Matte Black, select the Black color from the chart.
